

GHD-0410 Automatic Disposable Outer Face Mask Machine 1in1

"GRAND" brand one drag two full-automatic plane mask machine, this machine is the ideal equipment for producing inner ear mask, the raw materials from entering to the output of finished products are fully automatic operation, reducing the contact with human body in the production process, so as to meet the industry detection standard; the other equipment is composed of three manufacturing units, using the automatic control platform, to combine multiple complex production processes of mask, which is practical Now mask raw materials to finished products of full-automatic production, high efficiency, saving labor.

GHD-0410 product picture:

Technical parameters:

Voltage:	single-phase 220V/50Kz	Working air pressure:	5 ~ 8 kgf	Power:	5KW
Production speed:	0~75pcs/min	Ultrasonic parameters:	20Khz	Overall size:	L5.5*W3.5*H1.8M
Yield rate:	≥95%	Package size:	2.26*0.82*1.6M 2.08*1.13*1.87M 2.77*0.73*1.25M 2.55*0.87*2.04M	Total weight:	2000KG

Product features:

- 1) Interface control is adopted, and parameters can be set as required.
- 2) The indentation can be designed at will, and different patterns can be made just by changing the flower wheel, which makes the product more beautiful and three-dimensional.
- 3) Imported ultrasonic technology can improve the stitching strength and evenness of products and ensure the

quality of products.

4) From the input production to the output of finished products, all automation, reduce labor costs and improve production efficiency.

5) The die is specially hardened and durable.

6) This machine is suitable for the welding of the outer ear band of the plane mask. It is an advanced automatic machine that fuses the elastic band with the ultrasonic wave on the outer side of the mask body to complete the finished ear band mask.

Manufacture Disposable face mask product specification:

Product Name:	Disposable face mask (3 layers)	Product size:	17.5x9.5cm
Product material (g/m ²) :	25g outer non-woven fabric + 25g inner melt blown fabric + 25g inner non-woven fabric		
Product grade:	Civil / medical	Executive standard:	GB/T32610-2016
