

GHD-0519 KN95 Automatic folding dust mask manufacturing machine

"GRAND" brand kn95 fully automatic folding mask integrated machine uses program control to complete automatic production from 3-6 layers of raw materials and complete the operation automatically, including the production process including automatic nose trimming, folding forming and ear band welding; the equipment uses servo feeding, positioning system and each production station to cooperate with high-quality production of folding mask; the mold can be adjusted according to the product, We produce all kinds of folding masks.

GHD-0519 product picture:

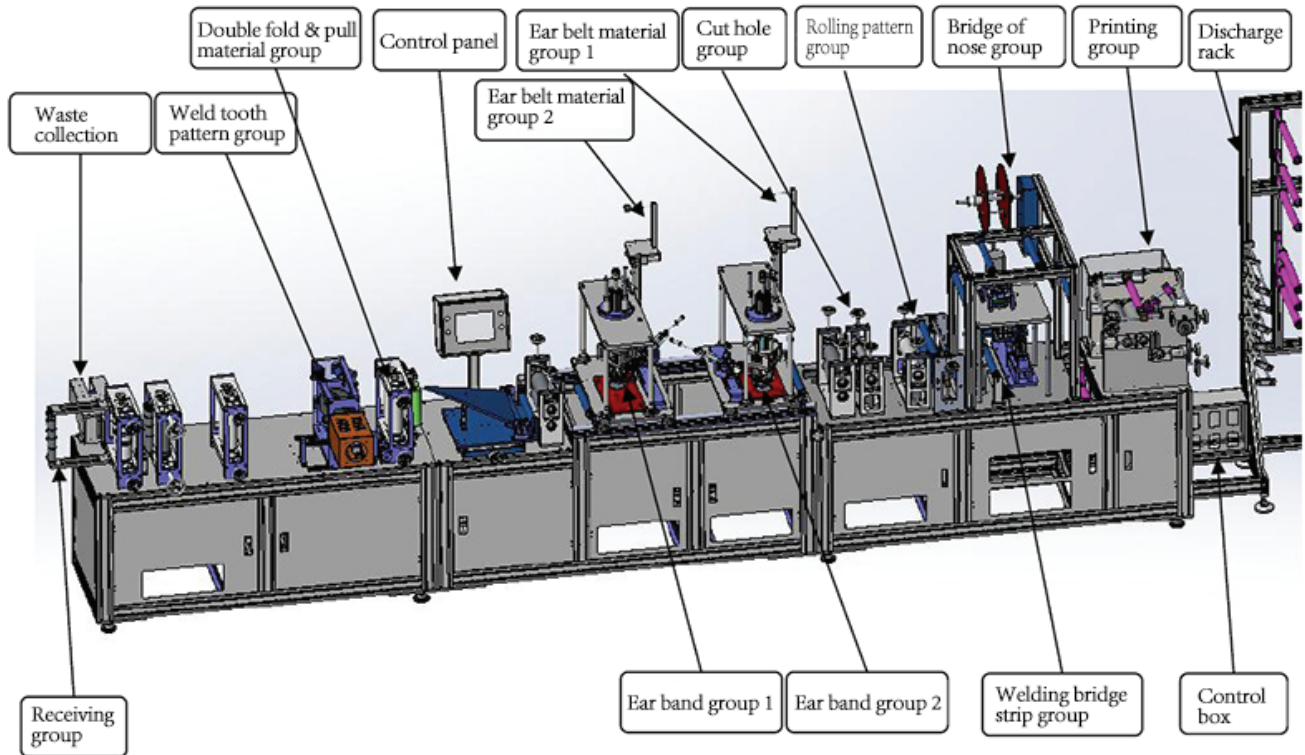

Technical parameters:

- 1) Voltage: two-phase 380V 2) Working air pressure: 5 ~ 8 KGF
- 3) Production speed: 0 ~ 50pcs / min 4) Overall dimension (mm): 12100 * 1400 * 1800mm

Product features:

1. This machine is designed for automatic production of folding mask. It uses servo control to complete automatic production, from raw material to finished product output and automatic operation;
2. The design concept and technology are mature, which can meet the needs of various folding masks;
3. Production efficiency, accurate folding, beautiful ear band welding, strong pulling force, automatic nose trimming and other functions;
4. Long time continuous operation and stable production, the qualified rate of products reaches 98%;
5. Fully automatic control, smooth operation and stable production;
6. 85% of the original purchased parts of the whole machine, with stable equipment quality and no process disturbance;

Manufacture Disposable face mask product specification:

Product Name:	Face mask (5 layers)	Product size:	10.5x16.5cm
Product material (g/m ²) :	25g outer non-woven fabric + 25g electrostatic melt blown fabric * 2 layers + 50g hot air cotton + 25g inner non-woven fabric		
Product grade:	Civil	Executive standard:	GB2626-2006
