

GT22-12 BRUSHLESS DD MOTOR & SUCTION INDUCTION
AUTO SLIGHTLY OILING TABLE STYLE THREAD TRIMMER MACHINE

Direct Drive motor

No Flexible

Carbon Brush Suction motor

Brushless Suction motor
(Save electricity, safety, long life,
10000 hours of free maintenance)

FEATHERS:

- Use Brushless suction motor, Long time use without maintenance ;
- Use auto induction system, auto stand by when thread trimming work is paused, avoid frequently start or shut up thread trimmer, reduce mechanical wear ;
- Use auto slightly oiling system, auto spray oil to the blade teeth timely, reduce working procedure and avoid bespatter garment by manual, perfectly protect blade ;

Technical Parameter:

Voltage	220V
Power	180W ~ 430W
Frequency	50/60HZ
Revolution	2850 ~ 3450RPM

GT26-12

TABLE STYLE BRUSHLESS DIRECT DRIVE & SUCTION AUTO SLIGHTLY OILING PORTABLE THREAD TRIMMER

Automatic trimming, applicable to knit clothes (children's clothes, underwear, T-shirt), Denim clothes (shirt, western-style trousers, jeans) etc, specially applicable to clothes with many ends of thread; easy to move, suitable for department of division of labor in large and small manufacturers.

No Flexible

Grand DD Motor

FEATHERS:

- Use Brushless clipper and suction motor, completely change the traditional flexible shaft transmission system, the mechanical transmission efficiency can be improved greatly and non-maintenance ;
- Use auto induction system, auto stand by when thread trimming work is paused, avoid frequently start or shut up thread trimmer, reduce mechanical wear ;
- Use auto slightly oiling system, auto spray oil to the blade teeth timely, reduce working procedure and avoid bespatter garment by manual, perfectly protect blade ;

Technical Parameter:

Voltage	220V
Power	180W ~ 430W
Frequency	50/60HZ
Revolution	2850 ~ 3450RPM

T20E-BL

DD MOTOR DIRECT DRIVE & BRUSHLESS
SUCTION INDUCTION MOVABLE STYLE
THREAD TRIMMER MACHINE

Technical Parameter:

Voltage	220V
Power	180W ~ 430W
Frequency	50/60HZ
Revolution	2850 ~ 3450RPM

Automatic trimming, applicable to knit clothes (children's clothes, underwear, T-shirt), Denim clothes (shirt, western-style trousers, jeans) etc, specially applicable to clothes with many ends of thread; easy to move, suitable for department of division of labor in large and small manufacturers.

FEATHERS:

1. Absolutely guarantee the consistency of high-quality products, will not cut clothes, and will not cut overlock stitches and stretch stitches, creating a perfect cutting effect.
2. Integrate the thread cutting and suction process into one, there is no leftover and end of the thread, ensuring clean clothing and working environment, purifying the air, and benefiting the health of workers.
3. The traditional manual thread trimming is upgraded to mechanization and simplification, which greatly improves the efficiency of thread trimming and easy maintenance.
4. Adjustable suction volume scale. Adjust the suction volume scale and replace the blade, which can be used for different fabrics.
